
Michael Grove

Senior Software Engineer Animax Designs (March 2021 - August 2023)
Proampac Engineering Manager (August 2023 - Present)

July 15 2024

To Whom It May Concern,

I am writing to provide my recommendation for Ebrahim Karam, who worked with me as a Software Engineer at Animax Designs. During our time together, Ebrahim demonstrated exceptional skills and made significant contributions to our projects across multiple international locations.

Ebrahim played a crucial role in the setup of interactives and animatronics for high-profile installations in Las Vegas, Singapore, Australia, China, and Abu Dhabi. His technical expertise, problem-solving abilities, and attention to detail were instrumental in ensuring the success of these complex projects.

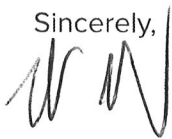

What impressed me most about Ebrahim was his ability to adapt to diverse environments and challenges. Whether working on-site in different countries or collaborating remotely with international teams, he consistently delivered high-quality results. His strong communication skills and cultural sensitivity were particularly valuable in our global operations.

Ebrahim demonstrated a deep understanding of interactive systems and computer systems consistently applying his knowledge to optimize performance and enhance user experiences. He was a wonderful asset in building GUIs and HMIs for our various animatronics. He was always eager to learn new technologies such as Perspective ignition, VMWare, and Structured Text with Beckoff PLCs

Beyond his technical abilities, Ebrahim was an excellent team player. He was always willing to support colleagues, share knowledge, and contribute to a positive work environment. His enthusiasm and dedication was infectious, often inspiring those around him to push boundaries and exceed expectations.

I am confident that Ebrahim would be an asset to any organization fortunate enough to have him. He has my strong endorsement, and I would be happy to provide further information if needed.

Sincerely,

Michael Grove
