**RE: Recommendation Letter to Mr. Ebrahim Karam**

To whom it may concern,

It is a pleasure for me to write this recommendation letter for Mr. Ebrahim Karam who has joined our startup NAR for the last 3 months as part of an internship program co-hosted by NAR & Beirut Digital District from June, 2017 until August, 2017.

Ebrahim, is a very hard working individual who was always doing his best to complete the tasks at hand even if that meant staying over hours at the office. He showed great dedication and courage to solve challenges and came up with great ideas related to our map development that greatly improved our software offerings.

Ebrahim's tasks have been mainly related to:

- Integrating GPS feed into NAR's software platform so that the anomalies detected while inspecting pipelines are geotagged.
- Employing HTML & CSS to automate the report generation resulting from pipeline patrols.
- Designing & developing an interactive map that allowed NAR's clients to see the concurrences, pipeline path, and flight path on google maps.

I am very happy about his stay with us. He has had a very positive attitude towards the proposed tasks, which is a vital characteristic when working for startups. This recommendation letter, can't be concluded without mentioning the great communication skills that Ebrahim had and the great relationships he built with everyone at NAR. He always succeeded in making our working environment more fun!

If further information is needed, please feel free to contact by email at: [charlie@nar.ai](mailto:charlie@nar.ai)

Sincerely yours,

Charlie El Khoury  
Co-founder & CEO
