

Recommendation Letter concerning Ebrahim Karam

To whom it may concern:

I've known Ebrahim Karam in the American University of Beirut as a student, through the Control Systems Lab (EECE 460L, Fall 2015) and Instrumentation course (EECE461, Spring 2016). He is currently working with me as a teaching assistant for the Control Systems lab, where he's assigned to do research for the lab, in addition to miscellaneous work related to the lab facility in general.

Ebrahim is a serious and hard-working person who successfully completes and delivers jobs assigned to him, conveying a sense of an individual who will go on to make a difference in their chosen career path. He is very punctual, attentive, with a sense of responsibility towards the tasks he's assigned with. When assigned with a novel research topic, which happened several times during his work with me as an assistant, Ebrahim took the challenge enthusiastically and made sure to deliver to the best of his ability and knowledge.

As a student, Ebrahim showcased an interest in the courses he took with me and performed well in them. His ability to work and collaborate as part of a team during lab assignments is outstanding. He presents complex ideas clearly, whether written or oral, which was relevant in class as well as during his job as my Teaching Assistant.

This is a relatively short recommendation meant to convey my satisfaction with Ebrahim's work and my highest evaluation and confident prediction for his future studies and work opportunities. I believe he will be a positive and a memorable persona in your institution. I highly recommend Ebrahim Karam for an internship in your institution.

Mihran Gurunian

Lecturer of Audio Engineering, Controls, Instrumentation, and Industrial Automation
Manager of the Electrical and Computer Engineering Laboratories
